John La Barge

Thanks for considering me for Circle C HOA Board Membership. I've lived in Austin for the past seven years. Time flies! I had the opportunity to serve on the board this year after a seat was vacated. I appreciate how committed the all-volunteer Circle C HOA Board is to listening to our member residents, acting to improve their experience and taking our fiduciary responsibilities to all residents seriously.

Day-to-day I'm a software engineering leader in Apple responsible for massively scaled payment systems. I have experience with managing teams, budgeting and bringing innovative systems to life. Prior to returning to my engineering career, I was a partner track associate at a big firm in DC where I specialized in patent litigation and pro-bono work including representing tenants in low-income communities and asylum seekers. I have a JD and BS from George Washington University. In short, I bring a broad experience that balances systems thinking, diligence, advocacy and empathy. I live in Avana with my beautiful wife and daughters, one a competitive track athlete and the other a start-to-be singer/dancer actress. We are busy people but I've enjoyed making time for our Circle C community to help the board make prudent decisions that do the best we possibly can for all our residents. Elect me and I will continue to listen to all your concerns and do my best to help give back to this community.

Phi Hung Nguyen

My daily job as a GPU architect is to work on improving each new generation of GPU's by 15% in terms of performance per watt. This will allow you to use your phone longer yet process applications faster. Before this job, I worked at Boston Dynamics for 3-years. Before that I was in San Diego working at Qualcomm Multimedia R&D for 5 years.

I went to UCSD for my undergraduate in Computer Science. Since I was interested in Computer Graphics, I proceeded through the BS/MS combined program specialize in Computer Graphics.

In my spare time, I compose music, draw/paint, or play piano (usually with my wife).

Randhir Soni

I call Circle C my home since last three. I have two school going kids and a lovely and very supportive wife. As I see myself living here long term, so I am very keen to invest my time and energy in our beautiful community and help it reach newer heights and make it the most desirable neighborhood to live in Austin.

By profession I am a Program manager and I have experience in visioning and executing Projects of varied sizes both in Professional space and personal space from start till end. I have worked with fortune 50 companies and helped execute large programs globally. By Education I am an Engineer and I love to solve problems.
